

SOUNDWEAVE

12 mm Acoustic PET Panels

SOUNDWEAVE, THE AFFORDABLE AESTHETIC
EFFECTIVE ACOUSTIC PANEL

Corporate • Café • School • Home Office • Home Theatre

AFFORDABLE	AESTHETIC	EFFECTIVE
Designer quiet without the designer price tag	Looks sharp. Feels intentional. Not industrial.	12 mm PET that actually absorbs sound. No gimmicks.

1200 mm × 2400 mm | Recycled PET | Easy install | Made for Australia

WHY SOUNDWEAVE?

Most acoustic panels force a choice: cheap foam that looks terrible, or premium designer panels that blow the budget. Soundweave removes the compromise.

The three things that matter

Real-world pricing that makes acoustic treatment possible for homes, small businesses, schools and offices — not just high-end fit-outs.	Clean modern felt finish. Looks like it belongs in a designer space. Vertical panelling effect is intentional and sharp.	12 mm thick PET felt delivers proper mid-to-high frequency absorption. Reduces echo, improves speech clarity, calms the room.

Built for Australian conditions

- Lightweight yet rigid enough for easy handling and clean joins
- 100 % PET (recycled content) — moisture resistant and non-irritating
- Pinable surface (great for classrooms and offices)
- Works on plasterboard, timber, concrete and most common substrates
- Supplied at full 1200 × 2400 mm — fewer joins, faster install

WHERE SOUNDWEAVE WORKS

One panel size. Endless real-world applications. Same clean look whether you're fitting out a home office or a café.

Corporate & Open Plan Offices

Cut echo in open-plan spaces. Improve speech privacy and focus. Looks premium without the premium price tag.

Cafés, Studios & Creative Spaces

Create a calmer atmosphere for customers and staff. Side-by-side 2400 mm panels make a strong architectural feature.

WHERE SOUNDWEAVE WORKS (cont.)

Schools & Education

Better speech clarity for teachers and students. Pinable surface. Tough enough for real classrooms. Budget-friendly for education projects.

Home Office & Home Theatre

Left: Clean home office feature wall. Right: Immersive home theatre with full wall coverage. Same panel, different vibe.

COLOURS & FINISH

Core range focuses on versatile, modern neutrals that work in almost any Australian interior. Charcoal and Light Grey are the everyday workhorses. Custom colours available on larger orders.

Charcoal • Warm Off-White • Soft Teal accent • Muted Clay • Light Grey

INSTALLATION – SIMPLE & FAST

Soundweave is designed for straightforward installation by professional trades or competent DIY. Full details are in the matching Installation & Care Guide.

- **Vertical orientation only** — looks best and minimises visible joins
- **Butt-join method** — tight edges, clean panelling effect
- **Contact or construction adhesive** — proven on plasterboard, timber, concrete
- **1200 × 2400 mm format** — fewer panels = faster install and fewer joins
- **Sequence packaging** — colour consistency built in
- **Optional aluminium edging** — for exposed edges

Full step-by-step guide, cutting tips, adhesive advice and care instructions are in the companion document: **Soundweave 12 mm Panel Installation & Care Guide**.

STRAIGHT TALK FROM THE FOUNDER

Soundweave started as a bootstrapped, grass-roots response to a simple problem: good acoustic treatment was either ugly or expensive. We make 12 mm PET panels that look sharp, actually work, and are priced so real people and real businesses can use them.

No fluff. No over-engineering. Just solid panels, honest pricing, and clear instructions. If you need acoustic panels that don't force a compromise, you're in the right place.
